Syed Mahmood Ejaz

Karachi, Pakistan | +923322396999 | mahmoodejaz8@gmail.com | LinkedIn | GitHub

Detail-oriented and motivated tech professional with hands-on experience across software development, data analysis, and user-cantered design through diverse internships and projects. Proficient in Python, JavaScript, and modern frameworks, I excel at turning innovative ideas into practical solutions. Skilled in teaching, research, content creation, and collaborative problem-solving, with a proven ability to deliver impactful results. Fluent in English and Urdu, with basic Turkish proficiency, I'm passionate about mastering emerging technologies to drive meaningful change.

Skills

Programming & Frameworks:

Python, JavaScript, JAVA(Basics), SQL.

Data Science & AI:

Research, Prompt Engineering, AI Automation, Data Analysis, and basic know how of agentic AI.

Tools & Other:

System monitoring tool Grafana/Prometheus.
Figma, CANVA, Microsoft Office.

Soft Skills:

Problem Solving, Leadership, Management, Teaching, Content Writing, Team work, Volunteering.

Experience

Lecturer (CIT, Prompt Engineering & AI for everyone) | *Bano-Qabil* | *July2025- present*

Teaching computer Information fundamentals and advanced topics as well as python language, prompting and basics of AI to students. Developing course materials, conducting lectures, and mentoring students in their technical journey.

UI/UX Intern | *Internship Pakistan* | *Aug 2025 - Oct 2025*

Designed user interfaces and experiences for web and mobile applications using Figma. Conducted user research, created wireframes and prototypes, and collaborated with development teams to implement design solutions that enhance user engagement.

Machine Learning Intern | *Elevvo Pathways* | *Aug 2025 - Sep 2025*

Worked on machine learning projects involving data preprocessing, model development, and evaluation. Implemented various ML algorithms for predictive analytics and gained hands-on experience with Python libraries including scikit-learn, Numpy, and Pandas.

AI Computer Vision Intern | *The Disrupt Lab* |*Aug 2023 - Nov 2023*

Worked on computer vision projects including image recognition, object detection, and facial recognition systems, using python language.

Education

BS in Artificial Intelligence | Dawood University of Engineering Technology, Karachi
2021 – 2025 (CGPA 3.73)
Intermediate – Pre-Engineering | Government National College

Matriculation – Computer Science | Peace International School

Projects

AI-driven Learning Platform (FYP):

3D Virtual AI Classroom with Llama 70B model. A teacher avatar delivers interactive AI lessons. Uses prompt engineering for AI-only responses. Handles text/speech input and output for engaging student queries.

Sentiment Analysis on IMDB Movies Dataset:

Sentiment analysis with word clouds, LSTM classification, Logistic Regression (BOW/TF-IDF), and LDA topic modelling on review data.

Movie Recommendation System:

It outlines the creation of a movie recommendation system using a user-item matrix and cosine similarity. The goal is to recommend top-rated, unseen movies to users.

Music genre Classification:

This project involves classifying songs into different genres based on their extracted audio features. A Random Forest Classifier model was trained for this multi-class classification task.

Student Score Prediction:

This project focuses on building a linear regression model to predict student exam scores. The model uses study hours and other student performance factors as input.

NASA space App:

An AI generated app using prompting for complex astronomical images to be instantly understandable and interactive, with real-time feature detection, layered visuals, and user-created content.

Face Detection System:

An attendance marking system through face detection using python's library Open CV.

Certifications & Courses

Google Data Analytics | *Coursera*
Prompt Engineering | *Coursera*
Machine Learning Foundation | *AWS*
Introducing Generative AI | *AWS*
AI Essentials | *Coursera*
Project Management | *Coursera*

Leadership & Co-Curricular Activities

Hackathons | Remote.Base Hackfest 3.0, Devtown, NASA space App challenge
Treasurer | Artificial Intelligence Society, DUET (Dec 2023 – Dec 2024)
Content Writer | Dawoodian Media Society.
Published Articles | Wrote articles on "Recent internet problem across Pakistan" and on "Natural Disaster Monitoring using CV".
